TWINKLE BLUE

Not good for body

COLONIAL MAHOGANY

Should not be trimmed unless in Gold

NOTE—The names in capital letters denote colors to be used on the large areas; those in small letters denote trim colors.

Quick-Drying Enamel

DIRECTIONS

Shake the can well before opening. Then stir the contents thoroughly and the enamel is ready for use.

PREPARING THE SURFACE—Be sure the surface is perfectly dry and free from dirt, grease, oil or wax. Sandpaper smooth with fine sandpaper. Then dust with a good bristle duster.

NEW WORK—Lowe Brothers Quick-Drying Enamel should be thinned for first coat on new wood about ten per cent with turpentine. Allow to dry four or five hours. When applying the second coat, use the Enamel as it comes in the can without thinning.

OLD WORK—Apply Lowe Brothers Quick-Drying Enamel as it comes in the can without thinning. Ordinarily one coat will be sufficient except when lighter colors are used over a dark surface. In such cases two coats should be applied.

QUICK-DRYING ENAMEL FOR FLOORS—Experience has proved that Quick-Drying Enamel is satisfactory for use on floors (wood, concrete or cement). Occasionally more brilliant colors are desired for floors in preference to the regular colors of our Quick-Drying Floor Enamel. Such colors are found in our Quick-Drying Enamel. **New Floors**—Apply three coats. Enamel for first coat should be thinned about ten per cent with turpentine and the material for second coat thinned slightly with turpentine. Third coat should be applied using the enamel as it comes in the can without thinning. **Floors Previously Painted**—Apply two coats. Thin first coat about ten per cent with turpentine. For finishing coat, use Quick-Drying Enamel as it comes in the can without thinning.

For Use On

Woodwork Furniture Metalwork Breakfast Sets
Chairs Bedroom Furniture Nursery Furniture
Kitchen Furniture Porch Furniture Shelves
Tables Wicker Furniture Radio Cabinets
Phonograph Cabinets Go-Carts Bookcases
Floors Music Cabinets Smoking Sets
Telephone Stands Vases Glass Tin
Picture Frames Flower Pots Toys
Magazine Stands Baby Carriages
Canvas Cupboards Automobiles

QUICK-DRYING ENAMEL

for EXTERIOR or INTERIOR
WOODWORK, FURNITURE
METAL WORK, TOYS, ETC.

Malbone Mfg. Co.
South Haven, Mich.

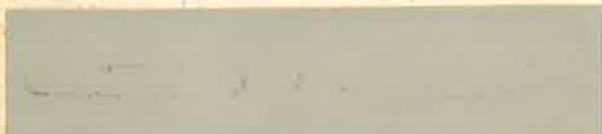

Lowe Brothers Quick-Drying Enamel dries quickly and produces an attractive, hard, durable surface.

It covers and hides so well that ordinarily one coat will be sufficient.

MIST GRAY 866

Dries dust-free in one hour; can be recoated in from four to five hours, and dries hard over night. It sets slowly enough to allow ample time for brushing back through the wet enamel to smooth out any imperfect places.
